Azmi Haider

Summary

PhD researcher in computer vision and generative modeling (diffusion models, flows, token-based implicit representations). Strong Python/PyTorch skills with end-to-end research experience from modeling to evaluation. Open to relocation; seeking research internships.

Work experience

2022 – 2023 | **Teaching Assistant** – University of Haifa, Israel
Led tutorials and office hours for the Advanced Computer Vision course; mentored students on assignments and course projects.

2021 – 2022 | **Data Scientist (Face Recognition)** – Intel Corporation, Haifa, Israel
Developed image-cleaning, detection, and synthetic-data generation pipelines to expand training data.

2015 – 2021 | **Computer Vision (3D Cameras & LiDAR)** – Intel Corporation, Haifa, Israel
Built metrics and evaluation tools to characterize depth-camera quality across 2D and 3D modalities.

Education

2022 – Present | **Ph.D. in Computer Science** – University of Haifa, Israel
Thesis: *Efficient probabilistic inference in continuous domains with tokenized representations and amortized generative sampling*.
Advisor: Dr. Dan Rosenbaum.

2017 – 2020 | **M.Sc. in Computer Science** – University of Haifa, Israel
Thesis: *Forgery Detection in Depth Images*.
Advisor: Prof. Hagit Hel-Or.

2012 – 2017 | **B.Sc. in Electrical Engineering** – Technion – Israel Institute of Technology
Focus: computer and software engineering.

Scholarships and certificates

2022 – 2025	**Data Science Research Center (DSRC) Funding for PhD Students** – University of Haifa
2022 – 2025	**Excellence Scholarship** – University of Haifa
2020	**M.Sc., graduated with honors** (GPA: 94)
2018 – 2019	**Research Funding** – Israeli Science Foundation (ISF), University of Haifa
2018	**Research Funding** – Center for Cyber Law and Policy (CCLP), University of Haifa
2011 – 2016	**N.A.M. Scholarship for Outstanding Arab Youth** – Full-degree scholarship, Technion

Publications and posters

A. Haider and D. Rosenbaum. Tokenized Neural Fields: Structured Representations of Continuous Signals. NeurIPS 2025, Workshop on Structured Probabilistic Inference and Generative Modeling.

A. Haider and D. Rosenbaum. Predicting 3D Structure by Latent Posterior Sampling. ICLR 2025, Workshop on Frontiers in Probabilistic Inference: Sampling Meets Learning.

A. Haider and H. Hel-Or. What Can We Learn from Depth Camera Sensor Noise? Sensors, 22(14):5448, 2022.

N. Privman-Horesh, A. Haider, and H. Hel-Or. Forgery Detection in 3D-Sensor Images. Proceedings of the IEEE/CVF Conference on Computer Vision and Pattern Recognition Workshops (CVPRW), 2018.

Skills

Programming: Python (PyTorch), OpenCV.

Generative modeling: Autoregressive Transformers, VAEs, normalizing flows, diffusion models, flow matching.

3D vision: NeRF, implicit representations, 3D reconstruction, depth-camera analysis.

Other: Reinforcement learning.
