AZMI HAIDER

RESEARCH PROFILE

PhD researcher in generative modeling and computer vision at the University of Haifa, focusing on probabilistic inference and efficient generative modeling.

My research explores diffusion and flow-based models, fast amortized sampling, and structured neural representations for high-dimensional continuous data, including images and 3D scenes.

I develop and evaluate new generative inference methods in PyTorch-based research pipelines, combining probabilistic modeling with vision applications.

Interested in research roles in generative AI, probabilistic machine learning, and multimodal generative systems.

PUBLICATIONS

A. Haider and D. Rosenbaum. **Direct Flow Neural Processes: Efficient Sampling via Flow Step Amortization.**

Under submission.

D. Aibinder, A. Haider, and D. Rosenbaum. **Empirical Bayes Flow Matching for Continuous Cryo-EM Heterogeneity.**

Under submission.

A. Haider and D. Rosenbaum. **Tokenized Neural Fields: Structured Representations of Continuous Signals.**

NeurIPS 2025 Workshop on Structured Probabilistic Inference and Generative Modeling.

A. Haider and D. Rosenbaum. **Predicting 3D Structure by Latent Posterior Sampling.**

ICLR 2025 Workshop on Frontiers in Probabilistic Inference: Sampling Meets Learning.

A. Haider and H. Hel-Or. **What Can We Learn from Depth Camera Sensor Noise?**

Sensors, 22(14):5448, 2022.

N. Privman-Horesh, A. Haider, and H. Hel-Or. **Forgery Detection in 3D-Sensor Images.**

Proceedings of the IEEE/CVF Conference on Computer Vision and Pattern Recognition Workshops (CVPRW), 2018.

PROFESSIONAL EXPERIENCE

2022 – 2023	Teaching Assistant – University of Haifa, Israel Led tutorials and office hours for Image Processing and Advanced Computer Vision courses, mentoring students in coursework and project development.
2021 – 2022	Data Science Intern (Face Recognition) – Intel Corporation, Haifa, Israel Developed image preprocessing, detection, and synthetic data generation pipelines for face recognition model development.
2015 – 2021	Computer Vision Internships (3D Cameras & LiDAR) – Intel Corporation, Haifa, Israel

Designed evaluation methodologies for 3D camera and LiDAR quality across 2D/3D sensing pipelines used in deployed computer vision systems.

EDUCATION

2022 – PRESENT	Ph.D. in Computer Science – University of Haifa, Israel Thesis: <i>Efficient probabilistic inference in continuous domains with tokenized representations and amortized generative sampling</i> . Advisor: Dr. Dan Rosenbaum. Expected graduation: September 2026.
2017 – 2020	M.Sc. in Computer Science – University of Haifa, Israel Thesis: <i>Forgery Detection in Depth Images</i> . Advisor: Prof. Hagit Hel-Or.
2012 – 2017	B.Sc. in Electrical Engineering – Technion – Israel Institute of Technology Focus: computer and software engineering.

TECHNICAL SKILLS

Programming: Python, PyTorch, OpenCV, Linux, Git, Weights & Biases, multi-GPU experimentation.

Generative Modeling: Diffusion models, flow matching, normalizing flows, variational autoencoders, autoregressive models.

Computer Vision & Representation Learning: Implicit neural representations, 3D reconstruction, NeRF, probabilistic inference, representation learning.

AWARDS AND FUNDING

2022 – 2025	Excellence Scholarship – University of Haifa
2022 – 2025	PhD Research Fellowship – Data Science Research Center, University of Haifa
2011 – 2016	Full Scholarship (Outstanding Students Program) – Technion
