AZMI HAIDER

SUMMARY

PhD researcher in computer vision and generative modeling, focused on fast probabilistic inference and guided generation with token-based neural representations. Research includes controllable generative processes across modalities, including 3D scene understanding and view synthesis. Strong Python/PyTorch skills with end-to-end research experience from modeling and implementation to large-scale experimentation and evaluation. Expected PhD graduation: September 2026 (flexible; open to earlier start). Open to relocation. Interested in research positions starting 2026 (internship or full-time).

WORK EXPERIENCE

2022 – 2023	Teaching Assistant – University of Haifa, Israel Led tutorials and office hours for the Advanced Computer Vision course; mentored students on assignments and course projects.
2021 – 2022	Data Science Intern (Face Recognition) – Intel Corporation, Haifa, Israel Developed image-cleaning, detection, and synthetic-data generation pipelines to expand training data.
2015 – 2021	Computer Vision Intern (3D Cameras & LiDAR) – Intel Corporation, Haifa, Israel Built metrics and evaluation tools to characterize depth-camera quality across 2D and 3D modalities.

EDUCATION

2022 – PRESENT	Ph.D. in Computer Science – University of Haifa, Israel Thesis: <i>Efficient probabilistic inference in continuous domains with tokenized representations and amortized generative sampling.</i> Advisor: Dr. Dan Rosenbaum.
2017 – 2020	M.Sc. in Computer Science – University of Haifa, Israel Thesis: <i>Forgery Detection in Depth Images.</i> Advisor: Prof. Hagit Hel-Or.
2012 – 2017	B.Sc. in Electrical Engineering – Technion – Israel Institute of Technology Focus: computer and software engineering.

SCHOLARSHIPS AND CERTIFICATES

2022 – 2025	Data Science Research Center (DSRC) Funding for PhD Students – University of Haifa
2022 – 2025	Excellence Scholarship – University of Haifa
2020	M.Sc., graduated with honors (GPA: 94)
2018 – 2019	Research Funding – Israeli Science Foundation (ISF), University of Haifa
2018	Research Funding – Center for Cyber Law and Policy (CCLP), University of Haifa
2011 – 2016	N.A.M. Scholarship for Outstanding Arab Youth – Full-degree scholarship, Technion

SKILLS

Programming: Python (PyTorch), OpenCV.

Generative modeling: Autoregressive Transformers, VAEs, normalizing flows, diffusion models, flow matching.

3D vision: NeRF, implicit representations, 3D reconstruction, depth-camera analysis.

Other: Reinforcement learning.
